

Hierarchy Notes

- If Not Logged In:
 - **Main Page** First
 - Encourage users to login or sign up
 - Center login/signup buttons
 - Can Search Classes
- If Logged In:
 - **My Classes** First
 - Dashboard-style
- Moving Forward
 - Recreate current SourceGrade structure, add new features
 - Remove “Account” page/feature
 - Class Standings/Statistics
 - Should be combined under one page
 - User must enter page url every time, unless they can add it to their account
 - Still need:
 - Class stats
 - Login/signup functionality
 - Focus: apply react to make login and class stats view
 - I focus on:
 - Class stats/standings module
- Courses Dashboard
 - “My Classes”
 - One Module
 - Should include stats and standings
 - Different retrievals require different JS functions
- Next Target

- **Focus:** Data Visualization
- Don't make "My Classes" page yet, just focus on Class Standings/Statistics
- Secret Number can still be searchable by JS, so slider could be moved into Stats/Standings page
