

An underwater view of a swimming pool with lane lines and swimmers in the background.

New Tides for SwimPhone

A re-design and development proposal

CHRIS KORKOS
Project Manager

EXPERIENCE

- Cognitive Science Major with minors in Writing and Computer Science
- CogSci Series: Usability and Info Hierarchy, other design-focused courses
- Computer Science Series: Took classes focused on the logic behind building programs and skills necessary for enhancing websites

PAST PROJECTS

- Rally: Independent project with Professor Boyle and other students; Designed and developed mobile app for game organizing
- Practicum in Pro Web Design: Redesigned the site for the Virtual Reality Club at UCSD

J DELANEY
Lead Developer

EXPERIENCE

MongoDB

- Built fuzz testing system leading to discovery of over 2 dozen fatal bugs
- Extended internal code review system used by 200 engineers

CloudFlare

- Developed for Red October anti-espionage system
- Contributed to CFSSL, a safer alternative to OpenSSL

Moebius Solutions

- Led creation of tactical video recall - reconnaissance tool used by the Marines

CAIDA

- Performed research on internet topology

UPCOMING

- Core API Team at Stripe

ALYSSA O'NEILL
Lead Visual Designer

PAST EXPERIENCE

- Web Designer of Guardian Newspaper
- UX Designer of Aqua Design Innovations
- UX researcher for LearnWorld
- Instructional Apprentice for Information Architecture under Professor Boyle
- VP Outreach of Design.UCSD: fostered design community, lead informative workshops

PAST PROJECTS

Ideorbit

- Note-taking mobile web app that enables users to organize ideas intuitively through a tactile interface
- Won "Most Elegant Solution" out of 79 teams

Visit

- 3-D Art Sharing Platform for amateur artists

UPCOMING

- Product Design at DirecTV/ATT

JAKE BROWNE
UI/UX Researcher

PAST EXPERIENCE

Language and Sound Recognition Lab

- Design, analyze and run experiments regarding music perception

Social Computing Research Lab

- Design data visualizations and CSCW platforms

PAST PROJECTS

Rally

- Design an app for short-term gamer matchmaking

Cyborg Sounds

- Designed and tested a product which augmented music performance
- Won first place in design competition here at UCSD; \$1000 in funding

JENNIE YOON
Lead Visual/UI Designer

PAST EXPERIENCE

Graphic/Web Designer & Marketing Intern

- Design and implement for both web and print

Webmaster

- Design and maintain dynamic web sites and pages for both university and public audiences

Web Designer

- Design and develop the entire lifecycle of a website

PAST PROJECTS

CodeSketch

- Bringing coders and designers together to create wonderful side projects

Grizz

- Won "Most Human-Centered" out of 79 teams
- Rent or list outdoor gear on a mobile platform

UPCOMING

- User Experience Design at DirecTV/ATT

MICHAEL HOHL
UX Researcher/Designer

PAST EXPERIENCE

Research Assistant

- Conducted participant-based research

Critical Design Instructional Assistant

- Provided guidance to students on their design projects

Design Programming Chair of Design.UCSD

- Lead workshops teaching Adobe Illustrator, storyboarding, and design sprints for a pre-professional design organization

PAST PROJECTS

Grizz

- Rent or list outdoor gear on a mobile platform
- Won “Most Human-Centered” out of 79 teams

CodeSketch

- Online platform that connects designers and coders with each other to work on their own side projects

UPCOMING

- UX Design at Viget Labs

TAVISH GRADE
UX Designer

PAST EXPERIENCE

Undergraduate Researcher, The Design Lab UCSD

- Performed ethnographic research

Research Assistant

- Design and conduct experiments

PAST PROJECTS

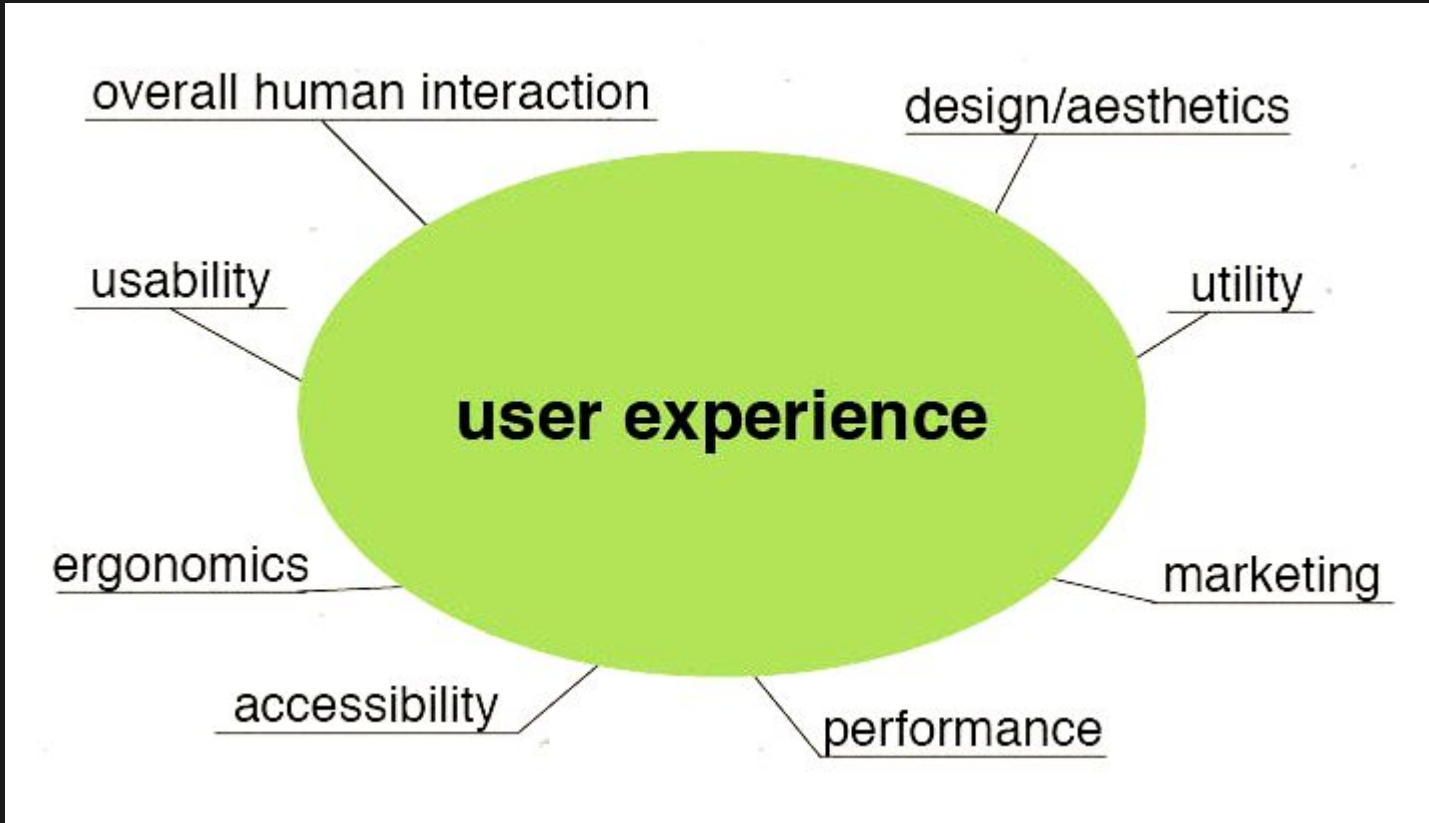

CodeSketch

- Bringing coders and designers together to create wonderful side projects

Flossy

- Webapp offering the gamification of flossing for both adults and children

ART

in 447 BC to replace

The five main instigators of the design and construction on the Parthenon were Pericles, Phidias, Kalamis, Ictinus and Calibrates. Pericles was the leading Athenian statesman at the time, Phidias and Kalamis were in charge of the design of the sculptures and decorations, and Ictinus and Calibrates were the main architects. The vast majority of the 469 silver talents spent on the Parthenon went on transporting the stone from Mount Pentelikos, which was about 16 kilometres from Athens, to the Acropolis. It is thought there are around 13400 stones in the building. The Parthenon is a clear example of Doric design with Ionic architectural features. The architects used a clever visual effect in their design of the building. The curvature of the Stylobate, the taper of the Naos walls (housing the cult statue) and the Entasis of the columns allow the visual effect to make the temple appear more symmetrical than it actually is. This design was so renowned it has been copied centuries later, even the Romans incorporated it into the design of their buildings, and a good example of this can be seen at the Roman library at Ephesus. Measured at the top step, the dimensions of the base of the Parthenon are 69.5 meters by 30.9 meters (228.0 x 101.4 ft). The Cella was 29.8 meters long by 19.2 meters wide (97.8 x 63.0 ft), with internal Doric colonnades in two tiers, structurally necessary to support the roof. On the exterior, the Doric columns measure 1.9 meters (6.2 ft) in diameter and are 10.4 meters (34.1 ft) high. The corner columns are slightly larger in diameter. The Stylobate has an upward curvature towards its centre of 60 millimetres (2.36 in) on the east and west ends, and of 110 millimetres (4.33 in) on the sides. Inside the Cella it was made up of both old and new elements. There was a double p-i-shaped colonnade which held the statue Athena Parthenos. The statue showed Athena dressed in full armour holding Nike (Goddess of Victory) to the Athenians in her right hand. In the west room (Opisthodomos) were 4 Ionic columns. The two sloped wooden roofs had marble tiles with false lion shaped spouts in the corners and false palmette shaped antefixes running along the edge. The room also held large marble statues placed on corner pediments, which were adorned with depictions of Athena's life. The East Pediment showed Athena's birth from Zeus' head whilst the Olympian Gods watched. The West pediment portrayed the dispute between Athena and Poseidon over control of Athens in front of Heroes, the Gods and the mythical Kings of Attica. The Outer Colonnade was made up of 92 metopes alternating with Triglyphs that were placed above the epistyle underneath the architrave, all of which held reliefs, (Trojan War on the northern side, Centauromachy on the southern side, Amazonomachy on the western side and Gigantomachy on the eastern side). The Frieze (dated 442-438 BC), which ran along the top of the Opisthodomos, Pronaos and the Cella was of the Ionic order and showed the greatest Athenian festival 'Panathinaia'. The festival held a procession from the Dipylon Gate in the Koromikios to the Acropolis. The procession was held yearly and had a special procession every fourth year. Athenians and foreigners came together at the festival, with all paying tribute and offering sacrifices to Athena. The Parthenon had been kept in relatively good condition right up until the 19th century. During this time it had seen a number of changes. For nearly a thousand years the Parthenon was still used as a temple to Athena until as late as the 4th Century AD. By this time Athens had been turned into a province of the Roman Empire and had lost most of its former glory. Unfortunately,

THE PRESENT

Founded in 2009, SwimPhone is the largest provider of Live Swim Meet results. We have contracts with United States Masters Swimming, Masters Swimming Australia, Masters Swimming Canada, NCAA Division I, II and III conferences, community colleges and high school federations. SwimPhone is the only cloud-based live swim results for mobile devices. SwimPhone works on iPhone, Droid, Blackberry and any web browser. SwimPhone integrates with any meet running Hy-Tek Meet Manager or SwimWorks Meet Manager.

We have contracts with high school state organizations, community college state organizations, collegiate conferences and USMS LMSCs. Please review our information and if you have any questions please contact us.

Easy to use, infinitely configurable.

An underwater photograph of a swimming pool. Several swimmers are visible in the background, moving through the water. Lane lines with floats are stretched across the pool. The water is clear, and the lighting is somewhat dim, creating a serene atmosphere. The text 'QUESTIONS & COMMENTS' is overlaid in the center in a white, sans-serif font. Below the text is a decorative, wavy, light blue horizontal line.

QUESTIONS & COMMENTS
