Profile

I am a UX Designer with experience in research-heavy work on speculative and future technologies. I create interactive design experiences by combining high-fidelity design tools with prototyping software and programming.

Experience

Visual/UX Designer

May 2018 - Present

Pacific Science & Engineering

Designed interface interactions and visuals, researched user requirements, and developed front-end tool interfaces of applications for use by Naval officers and other government personnel. Collaborated with subject matter experts to meet user needs and innovate on existing technology.

UX Designer

August 2017 - February 2018

Yomp

Designed business-facing website from wireframes and portfolios to developed pages, and built interactive prototypes for testing purposes. Collaborated remotely due to decentralized nature of team.

Programming Instructor

August 2017 - May 2018

ThoughtSTEM

Taught introductory coding lessons to children in grades kindergarten through middle school. Received additional training in JavaScript, Java, and Racket programming languages.

Freelance Web Designer

January 2016 - May 2018

Independent

Conducted web design contract jobs as a designer and developer. Clients included a campus organization, an independent business, and a university professor.

Education

University of California, San Diego

September 2012 - June 2017

B.S. in Cognitive Science, specializing in Human-Computer Interaction
Minor in Literature Writing
