Profile

I am a UX Designer with experience working on information, security, and commercial systems. I create interactive design experiences by combining high-fidelity design tools with prototyping software and programming.

Experience

Visual/UX Designer   May 2018 - Present
Pacific Science & Engineering

Improved usability and interaction with Naval systems through interactive and visual design specifications, research on users and industry standards, and front-end development. Collaborated with subject matter experts to meet user needs and innovate on existing technology. Earned authorship on research papers by contributing design and research work.

UX Designer   August 2017 - February 2018
Yomp

Improved internal company workflow by building the business team's website from wireframes and portfolios to developed pages. Built interactive prototypes of the main mobile app for testing purposes. Collaborated remotely due to decentralized nature of team.

Programming Instructor   August 2017 - May 2018
ThoughtSTEM

Taught coding lessons to students in kindergarten through middle school. Received training in JavaScript, Java, and Racket programming languages, and used programming knowledge to improve internal company code.

Freelance Web Designer   January 2016 - May 2018
Independent

Conducted web design contract jobs as a designer and developer. Clients included a campus organization, an independent business, and a university professor.

Education

University of California, San Diego   September 2012 - June 2017
B.S. in Cognitive Science, specializing in Human-Computer Interaction
Minor in Literature Writing
