Development

HTML/CSS
JavaScript/jQuery
Bootstrap

Profile

I'm a UX Designer with experience working on information, security, and commercial systems. I create interactive design experiences by combining high-fidelity design with prototyping, research, and web programming.

Experience

Product Designer   March 2021 - Present
Stretto

Conducted interaction design, user research studies, and led design refinements with development team. Managed tasking and status in Jira alongside design, development, and QA teams.

Writer   May 2022 - Present
Skywind

Wrote item descriptions, world flavor text, quest direction, and character dialog. Researched new and existing game lore, and worked with designers and developers to ensure accuracy.

Visual/UX Designer   May 2018 - December 2020
Pacific Science & Engineering

Created interactive and visual design specifications, researched users and industry standards, and aided in front-end development. Collaborated with subject matter experts to meet user needs and iterate on designs.

UX Designer   August 2017 - February 2018
Yomp

Designed team's website from early mockups to developed pages. Built interactive prototypes of the main mobile app for testing purposes.

Programming Instructor   August 2017 - May 2018
ThoughtSTEM

Taught coding lessons from grades kindergarten through middle school. Learned JavaScript programming and helped improve company products.

Education

University of California, San Diego   2012-2017
*B.S. in Cognitive Science, specializing in Human-Computer Interaction
Minor in Literature Writing*
